## The Word for Today

### The seven – day challenge

*'Do everything without grumbling.'* **Philippians 2:14 NIV**

Some cancers, like skin cancer, are more obvious, and you can remove them. Then there is the kind that grows undetected and destroys your body. Complaining is like that; it impacts your health and sabotages your success. Paul says, *'Do everything without grumbling or arguing.'* (Philippians 2:14 NIV)

Christian Counsellor, Dr Ann Shorb, writes: 'If you find yourself ... feeling negative and down ... listen to what's being said around you. Is there a lot of grumbling and complaining? Are the people you spend time with constantly expressing discouraging thoughts and feelings? ... Maybe *you* are the one ... griping and complaining ... Many times, we become our own worst enemy, by developing angry or bitter attitudes ... Your thoughts and attitudes are your choice. Where you put your mind is up to you! ... Follow what the apostle Paul wrote about putting off the negative and putting on the positive (see Colossians 3:1-15 and Ephesians 4:20-32) ... Acknowledge that there are problems ... but don't dwell on them ... Do what you can to remedy the situation. Remember ... you can never change another person, only yourself and your attitudes ... Find the positives ... Focus on these and be thankful that God promises to be with you ... through the hard times ... Use Bible verses and inspirational sayings to re-focus when your thinking starts to go downhill ... By changing your thinking, you change your outlook, and by changing your outlook you change your life.'

To one person the world looks desolate; to another, the same world looks rich and interesting. What you *see* depends mainly on what you *look* for. Make up your mind not to complain for a day. Then, challenge yourself not to complain for a week. You will be amazed at how much better you feel.

# HAPPY 99<sup>TH</sup>

It's been a month of highs and lows for the Yaninee Institute.

An impromptu gathering was held at the Institute on Sunday the 17th to celebrate the building's 99th anniversary. Armed with sausages, salads and a cake (Thanks Jenny), a lovely afternoon of talking, eating and planning was had. Pity the chops got burnt!

The celebration for the building was also a reflective affair, brought on by the passing of Betty Denton, a champion of the Institute for many years. Discussion turned to how we are slowly losing the stories of a generation and that we must try to preserve what we can for the future.

So sit down with grandma and grandpa, turn your phone camera on, flick through those photo albums and let's capture their history.

Yaninee local, Jim Abbott, who is also celebrating his 99th birthday this year, had the honour of blowing out the candles.

Thank you, Jim.

100th 8-10 March 2025

Please share your Yaninee stories and photos with us.

## Vale Ron Wilson

William's Funerals and Tim Colman officiated at a "No Fuss" farewell for Ron Wilson on the 6th March.

Ron's cask depicted his shearing, scrub clearing, farming and quality wheat for all to add their respects.

Back to the Yaninee Hall for smoko and to reminisce.

Thank you to the pallbearers, Frankie (as Ron referred to Frank Scholz), Cate & Kelvin Scholz, Cordi Munro (words) and all.

## Hospital Garden Makeover

Have you been past the Hospital lately and noticed the new improved gardens? If not it's time for a drive by!

Recently installed is a Modern Junk Art Sculpture. This has been made possible by a generous donation to the Hospital Auxiliary Committee from the late Liz Hughes. Liz (Kerry Winter's Mum) was a lover of gardens and people so the committee thought this was most appropriate.

Geoff Martin—our local talented artist, is very happy to see his work displayed in such an important place.

Thanks to the active Hospital Auxiliary Committee for instigating the makeover of our Hospital garden. It has had a lot of attention over the last couple of years.

This could not have happened without the extra help of a few volunteers who were co-opted by the committee to help. Thanks also to Council for donating gravel and bark, and to the Hospital Gardeners for their support. Special mention must go to Traci Barnes who is now maintaining the garden so well.

Hopefully driving into the hospital or Medical Centre will now be a more pleasant experience for everyone in our district.

If you see something that needs attention don't be afraid to volunteer!

### Malleefowl Workshops

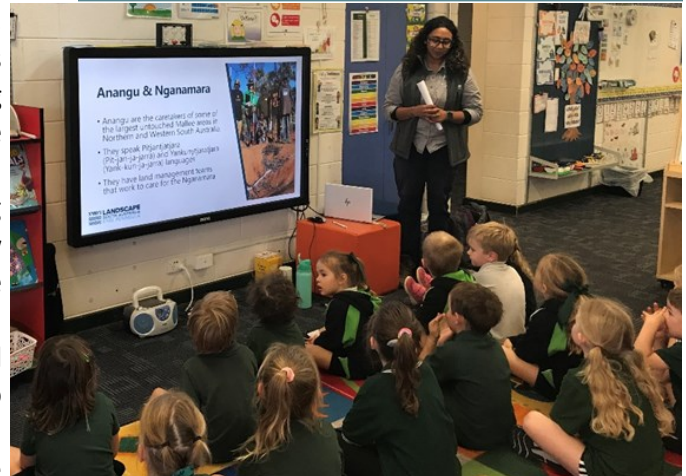

Over the last fortnight, Libby Hunt (from Streaky Bay) and myself brought Malleefowl workshops to 80 primary age students at Karcultaby Area School and Miltaburra Area School.

The workshops covered Malleefowl habitat, morphology, monitoring techniques and feral predator control. Students learnt about Malleefowl threats and habitat disturbance along with how integrating conservation with agriculture can increase the species' chance of survival.

The students were highly engaged in a role play activity learning about threats and habitat disturbance along with how integrating conservation with agriculture can increase the species' chance of survival.

The workshops culminated with students creating a Malleefowl habitat collage. Looking forward to bring more workshops to schools in the future!

Malleefowl are listed as vulnerable in Australia and on Eyre Peninsula their numbers are declining. We are involved with an annual monitoring program and also encourage the community to submit sightings to us at [www.landscape.sa.gov.au/ep/malleefowl](http://www.landscape.sa.gov.au/ep/malleefowl)

### Opuntia Cacti and the Cochineal Biocontrol's

Opuntia cacti plants should be controlled as they can spread very easily. The ripe fruit is an attractive meal to birds and foxes, which, after consuming the animal then deposits the seeds through their faeces. New plants can easily grow from pads that have been knocked off existing plants; so this species can spread very quickly into surrounding areas including pastoral regions, rangelands and native vegetation.

Cactus moth (*Cactoblastis cactorum*) and some species of the cochineal mealy bug (*Dactylopius* sp) have been introduced on the Eyre Peninsula. This utilises natural control agents to decrease the density and abundance of the cacti population. It is suited to large or remote locations and can be easily spread. Biocontrol's are only active in the warm months and are dormant over winter. Cochineal biocontrol's are specific to Opuntia species and ineffective unless the correct biotype is used.

All Opuntia cacti excluding spineless Opuntia ficus-indica and Tephrocactus spp. (prickly pear) are declared under the Landscape South Australia Act 2019. This means it is illegal to transport or sell these plants and all property owners have a responsibility to control Opuntia cacti on their property. Residents who rent their properties also have obligations to control declared species. This also includes anyone who is leasing property unless other arrangements have been made.

With the help of the Eastern Team, I have started some cochineal nurseys around the district. I would greatly appreciate if anyone knows, or sees any cactus while out and about, to please report them to me - along with GPS coordinates.

### Controlling Feral Deer and Goats on Eyre Peninsula

Grazing pressure from feral herbivore species such as deer and goats is having a detrimental effect on natural habitats across Eyre Peninsula (EP). Aside from overgrazing and soil erosion, they are also a vector for disease and cause significant damage to agriculture. Declared for control under the Landscape South Australia Act 2019 both species are increasing in abundance across EP.

This year's Landscape Priority Funding as seen \$275,000 dedicated for this project to reduce the impacts of pest herbivores across land tenures through:

- Targeted control of deer populations using thermal assisted aerial control (TAAC)
- Widespread control of goats using TAAC and traditional aerial control methods.
- Follow-up compliance with landholders to ensure any ongoing pest herbivore control is maintained.

To assist with this program, I encourage everyone to please report any feral deer or goat sightings in the district (with GPS coordinates) to myself.
